SOFTECHNOLOGIES ACQUIRES SCHEDULING AND DISPATCH BUSINESS FROM ANTENNA SOFTWARE

IP ACQUISITION COMPLEMENTS SOFTECHNOLOGIES SUITE OF FIELD SERVICE SOLUTIONS

Spokane, WA, May 20, 2010 – Softechnologies Corporation, a premier business and technology solutions provider, announced today it has acquired the Mobile Command Center field service solution from Antenna Software, the leading provider of real business mobility solutions to enterprises worldwide.

Acquired during the June 2009 acquisition of Dexterra by Antenna, the Mobile Command Center provides users of the Antenna Concert Platform with an end-to-end solution for the provisioning, scheduling, and dispatching of mobile field service technicians. Under terms of the deal, Softechnologies acquired strategic assets that include the Mobile Command Center intellectual property, select customers and related customers contracts, and channel partnerships. The acquisition complements Softechnologies suite of field service solutions and builds on their 14 years of commitment serving as a provider of enterprise mobility solutions, particularly those related to field service and field data collection.

“Through the acquisition of the Mobile Command Center solution, customers and channel relationships, Softechnologies is gaining a solution that we have long embraced and are very familiar with,” said Vance Blakely, President and CEO of Softechnologies. “As a service delivery partner with both Dexterra and Antenna Software, we understand first hand how powerful the Mobile Command Center is at automating and optimizing field service delivery. Coupling our engineering, deployment and integration expertise with this solution, Softechnologies is now well positioned to deliver our innovative approach of end-to-end service optimization to businesses large and small and simplify processes for customer service representatives, schedulers, dispatchers and service managers as they navigate a complex array of business challenges related to generating, provisioning, booking and scheduling diverse work loads and distributed workforces.”

“Antenna Software is fortunate to count Softechnologies as a valued partner and service provider,” said Jim DeSocio, Antenna’s executive vice president of global sales and business development. “Softechnologies’ domain expertise in floor-to-ceiling field service solutions makes it a natural fit to grow and enhance the Mobile Command Center offering. Furthermore, our strong alliance and mutual focus on the customer will ensure Antenna’s commitment to quality and service will continue uninterrupted.”

Terms were not disclosed.
